COVID -19 RELIEF WORK

After hearing and seeing the Corona Virus victims from different T.V. Channels and the news, our hearts were moved with pity for people. We had the desire to help them by providing food grains. So we went to Police station to find out how to go about and they guided us and told us to get ready with the things and we will take you to the areas where the working category people are there. These are the people who came for building construction work but could not go back to their place due to lockdown. Mean while we discussed in the community and decided to give some essential things for the people. Next day the S.I. from Rakhi Police station came with us for distribution and we went in three batches in three different days to distribute essential groceries. So far we have distributed to 40 families. Here are few photos of our charitable work. And the 2nd day's list of names. 1st day and 3rd day we did not make the list.
